RE: Closure of Surface Impoundment
Broski Brothers, Inc., Located at 39th & Belmont,
Kansas City, Missouri, EPA ID#: MOT300010972

Dear Mr. Broski:

References:

Letter dated June 2, 1996, Mr. Doug Allen/Missouri
Department of Natural Resources to Mr. Stan Broski/
Broski Brothers, Inc.

The Missouri Department of Natural Resources (MDNR) has received the closure certification report dated November 22, 1996, for the All-Brite Lagoon that was prepared by George Butler and Associates, Inc.

The closure certification report was submitted pursuant to 40 CFR 265.115. and appears to be satisfactory. As required by the approved closure plan modification, the area of concern shall be monitored quarterly for a period of one year. This one-year requisite precludes the MDNR from prematurely releasing the facility's closure trust fund at this time. As stated in the referenced letter, the closure trust fund monies shall be released upon acceptance of the certification report. Acceptance of the closure certification is based upon a successful demonstration that the site has been remediated, and therefore, is dependent on the results of the monitoring.

The MDNR will therefore review the monitoring results after the one year of monitoring and ensure that the results indicate a trend showing lower mobilization of metals in the water that has migrated through treated material. After successful demonstration by Broski, the trust fund shall be released.
